SUMMARY

Frontend Engineer with 2.5 years of experience building fast, scalable web apps using React, TypeScript, and Tailwind CSS. Led frontend architecture of a full analytics platform, integrating AI-driven insights, advanced filtering, and custom calendar logic. Proven impact in optimizing performance (60% faster load times) and delivering rich user experiences.

WORK EXPERIENCE

Assistant Frontend Developer — Revlitix Pvt. Ltd.

July 2022 - Present, Bangalore

- Led frontend architecture and development of the core analytics web app post manager's exit, owning product delivery, technical decisions, and overall frontend strategy.
- Migrated codebase from deprecated CRA to Vite, reducing dev boot time by 92% (2min → 10sec), CI/CD by 50%, and bundle size by 32% through asset optimization and dependency cleanup.
- Redesigned reporting system with 15+ interactive chart types and custom calendar supporting 40+ date ranges with advanced comparison logic (YoY, MoM, QoQ), improving reporting efficiency by 30%.
- Implemented IndexedDB caching with TTL for dashboard widgets, eliminating redundant API calls and enabling instant loads for unchanged configurations.
- Developed an advanced filtering system supporting nested AND/OR conditions and grouping logic, enabling users to build highly customizable and dynamic queries through a clean UI.
- Optimized frontend performance for large datasets using lazy loading, memoization, and virtual scrolling, cutting initial load time by 60%.
- Introduced consistent code quality and review standards within the frontend team.
